### Moon Nightclub

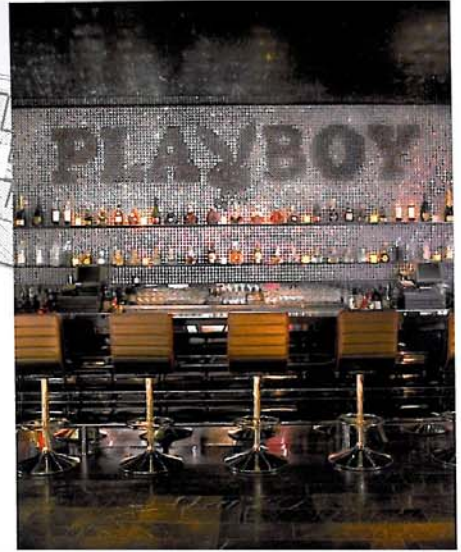

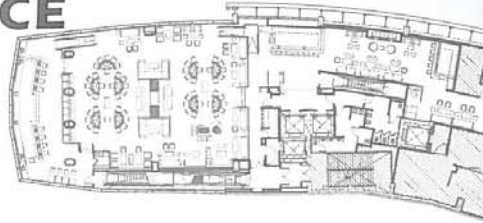

Opened in October, 2006, this 12,000 square foot nightclub is a bar and dance club on the top floor of the Palms Casino and Resort. It features a dance floor with VIP booths, a VIP room and a mezzanine. The client asked 555 to create a dramatic, surreal environment unlike any other in Las Vegas or the world, using the latest, most advanced technology in sound, light and special effects. The design and space planning allows ease of movement for patrons to all areas while the club is at full capacity, differing from congestion at other clubs.

## Playboy Club

This 12,000 square foot club and casino was opened in October of 2006. The objective was to design a club that would "pay homage to the past, but move into the future". Great importance was given to the iconic Playboy brand and staying true to the Playboy Mansion image. Care was taken in not trying to replicate something that has been done so successfully long ago but take its essence and re-create it for Las Vegas in 2007.
